Pusat Reka Bentuk Inovasi & Teknologi

26600, Pekan, Pahang

Malaysia

Phone. +609 431 5047

Company / customer Kementerian Pengajian Tinggi
Project description URTF Production Line
Job number PR000001
Project Type Car Absorber

Manufacturer (company)

Project name IR4.0_CarAbsorberAssemblyLine_Rev2
Installation Year 2023
Place of installation Teaching Factory
Responsible for project Rahimi

Created on 24/1/2025

Edit date 20/7/2025

by (short name) Lenovo

Number of pages 63

SAFETY REGULATIONS

Universiti Malaysia Pahang Al-Sultan Abdullah
Pusat Reka Bentuk Inovasi & Teknologi
26600, Pekan, Pahang
Malaysia

GENERAL SAFETY REGULATIONS

DANGER !

During plant operation certain items are under dangerous voltage!
Non-observance of safety instructions can result in death, serious injuries or material damage.

Only specialist personnel may carry out transport, installation and commissioning work.

The applicable valid standards as well as the national and / or company-specific accident prevention regulations are to be observed.

The following safety instructions are to be observed:

The erection, commissioning, troubleshooting as well as repair of the plant may only be carried out by qualified personnel that is familiar with the corresponding operating instructions.

Mounting of the devices has to be effected in accordance with the valid standards, state and local regulations.
Proper grounding and conductor dimensioning as well as proper short-circuit proofing have to be ensured.
These measures serve to ensure the safety of the plant and of the operating personnel.

Before carrying out safety checks, maintenance work and repair measures ensure that all the power supplies are switched off, are secured against being switched on unintentionally and are marked correspondingly.

Only test devices that are in a technically perfect condition and are suitable for the respective measurement may be used to carry out measurements!

The instructions specified in the respective operating instructions are to be followed strictly!
It is mandatory that hazard, warning and safety instructions be observed!

All doors and covers are to be kept closed during the plant operation.
If cooling devices are installed in the plant, ensure that these systems operate trouble-free.
These include the regular cleaning of the filters, in as far as they exist.
